S-NES CD-ROM...WHEN?

There has been a lot of talk in all of your magazines about the new Genesis CD-ROM. Well, I have the Super Nintendo and I am not happy that Sega is pulling ahead. What have you heard about a CD-ROM from Nintendo for the Super NES?

Scott Geddard
Houston, TX

Awesome! With Nintendo bringing out a CD-ROM for only \$200, Sega might as well give it up. Do you have any new specs, information or game names for this Genesis-killer? Will it have a speed-up board in the system cartridge? Can it do rotation and scaling better than the Mode 7? Will Mario 5 be the game included with the CD-ROM?

Ted Crawford
Philadelphia, PA

You guys always have the first information. With Sega now coming out with different operating system chips for its CD-ROM, will Nintendo do the same thing? I hope not because I really would like to play some of the Japanese games.

Mike Van Ewyk
Saginaw, MI

(Ed. Nintendo really dropped a bomb on Sega's plans when they released the information on their new CD-ROM at the Winter Consumer Electronics Show. With CD-ROM specifications quite similar to Sega's, but at a price considerably cheaper, Nintendo has built up considerable anticipation among game

players. Actually this was quite a shrewd move on their part. Knowing that hundreds of thousands of players were dumping the older 8-Bit NES for a better 16-Bit Genesis system, Nintendo decided to show its players that whatever Sega could do, Nintendo could do better and cheaper! Now, with super softs like Street Fighter 2, Zelda 3, Turtles 4 and Super Battletoads, and a CD-ROM due out at the end of the year, many players are quite content to get the Super NES and wait till Christmas for the CD-ROM.

Our sources have indicated that Nintendo will probably bring back the old "security chip" device to lock-out the non-U.S. CD-ROM games. It appears that Nintendo will install the security chip inside their CD-ROM drive and all U.S. disc software will have a program encoded on them which will look for the security chip and only work when it finds the chip. With regards to additional speed-up boards in the system cartridge, there doesn't appear to be any current plans for such a device. Remember, Nintendo is creating a bare-bones system at this price and any additional circuitry would substantially increase the cost of the system.)

STREET FIGHTER 2 UPDATE...

My favorite game in the arcades is Street Fighter 2. Capcom must know by now that this would be a dynamite home cartridge. Are they planning on doing a conversion for the Super NES? Hopefully they have learned from Final Fight that this has to be a two player game! Will it be two player? Will all the moves be built in? How about the sounds, and will there be slow down? How about the six button controller?

Jason Kuster
Clinton, MS

Street Fighter 2 is coming to the Super NES in June!

(Ed. Wow, you sure have a lot of questions! You're not alone though as we have over a thousand letters similar to yours! This indeed is going to be one hot game! Most of your questions are going to be answered in our special 6-page strategy guide starting on page 28. One look at the photos will show you how good this conversion is going to be! All of the moves, animation, sounds and characters are nearly perfect! You won't be disappointed! Expect to pay about \$80, and Capcom currently doesn't plan to bring out a special controller. That doesn't mean a third party joystick company won't do it though.)

WHERE IS...?

In your first issue, you showed a preview of Sim Earth by Imagineer. I have already blown through Sim City and I need something bigger to challenge me. Has Nintendo made any progress in translating and converting this super sequel to the Super NES? When will it come out?

Andrew Mills
Richmond, VA

(Ed. From what we were able to find out, Nintendo is not going to bring out this game. All is not lost, however, as the translation is complete and a U.S. third party company is very seriously considering doing it!)

**WE HAVE
ONE THING
TO SAY
ABOUT
CONTRA[®] III
FOR THE
SUPER NES.[™]**

The background is a vibrant, swirling red and orange flame-like pattern. Scattered across this background are several tilted comic book panels. The largest panel at the top shows a blue, multi-eyed monster with a long, glowing orange energy beam extending from its mouth towards a building. Other panels show various scenes: a city street with a yellow monster, a close-up of a monster's face, a monster's hand, and a monster's head. The word "BOOM." is centered in the middle of the image in a large, white, bold, sans-serif font.

BOOM.

In case you haven't heard, legendary Contra commandos have raided the 16-bit scene and blasted it to ballistic dimensions. **CONTRA III - THE ALIEN WARS™** is primed and designed to blow your mind. It will do things with your Super NES™ you never thought possible, and leave you quaking in your combat boots.

Mode 7 technology brings new meaning to military intelligence, engulfing you in a 3-D sensation and surrounding you with an alien-ridden apocalypse. Hyper-speed graphics run smooth with no breakups through vivid and volatile city streets, highways, skyways, factories and desert badlands to the guts of the archenemy alien, notorious Red Falcon. Scale walls and grip girders and ropes to maneuver your way past an army of gigantic beasts bursting out of your screen. Blast your way through side and top-view missions with advanced, double-fisted weapons. The explosions are the next best thing to being there, without the smell of smoldering alien.

This is the big one.
The mission your
Super NES was
built for.

ZELDA 3...WHEN?

I bought the Super Nintendo for one main reason - to play Zelda 3. I am a Zelda fanatic! I have been playing the first two versions over and over for years! What I need to know from you is - when will the third game be coming out? Every month since last fall I have been calling Nintendo and, every month they would tell me it would be coming out the next month. They have been saying that for a half a year now. Do you know when it really is coming out?

Jason Layton
Faribault, MN

Zelda 3 is now scheduled to come out on May 1!

(Ed. The game has been finished for some time now. It came out in Japan last November and the text translation does not take that long to do. We believe them, this time, that the game is finally finished. They are saying that Zelda 3 will be in most stores by May 1, 1992.)

BASKETBALL SIM...

I really like basketball games and am still searching for the perfect simulation for the home systems. I read all of your publications and when I heard you say that Super NBA Basketball would be coming from Tecmo, I got very interested. Their other sports games have been outstanding and I trust that they would do a good job on a basketball cartridge. I quickly called the Nintendo Consumer Service line and they said that there was no plans for any basketball games from Tecmo. Can you explain? Is it really coming out?

Kenneth Ganbill
Suffolk, VA

(Ed. Have you tried calling Tecmo? Most of the time if you have a question about a certain company's game, it is best to call the company that makes the game. That way you will get the best information from the people who know the product. Hey, if Nintendo can't tell game players when its own games (Zelda 3) are coming out, can you expect them to be able to tell you about somebody else's games? Yes, Tecmo will be bringing out a basketball game endorsed by the NBA. It will be for the Super Nintendo, but, unfortunately, it isn't scheduled to come out until very late in 1992! We did get a peek at it at the Winter Consumer Electronics Show and we can say that it will be worth the wait!)

SMASH TV...TOO HARD

My friend and I are very good at Smash TV for the Super Nintendo. Every time we beat the game, we find out that we haven't obtained enough keys. We are told by the showgirls that we have to explore more rooms. We were wondering if you could put your game playing expertise to the test and make maps of all the levels, and which routes you need to take to get all the keys.

Zeb Wells
Littleton, CO

(Ed. Smash TV is indeed a very challenging game and, by the way, it is the personal favorite of our head honcho. That being the case, he was more than happy to map out this hot cart! Check out his super strategy starting on page 24!)

A GENESIS CONVERT...

I have been a Genesis player ever since the system came out. The games were truly spectacular and a lot of fun to play. Last year, my friend got a Super Nintendo and he now has 15 games for it. Most recently, he bought the Japanese version of Contra 3 and that game was so good even I, a hard-core Genesis player, got hooked on the system. Now, I am over at his house more and more often. All I seem to

hear about are the great Super Nintendo games like Street Fighter 2, Turtles 4 and Wings 2. Sega offers nothing new and I am tired of waiting for their next batch of games. I sold my Genesis, bought a Super NES and haven't regretted it for a moment. Can we see more of the great carts coming out for this Super system?

Will Hershley
San Francisco, CA

(Ed. It took a bit of time for the programmers to learn how to make good games for this system, but now, with most of the slow-down and flicker taken care of in the new carts (check out Smash TV for some of the most intense action ever seen in a video game), the next batch of games (this fall) will really blow your mind!)

SUPER SCOPE...GOOD OR BAD?

I have been seeing ads for Nintendo's Super Scope. Have you tried it and is it worth the \$60. What type of games are planned for the future? I don't want to buy something that will end up dead in the water.

Charles Lask
Spokane, WA

(Ed. We have mixed reactions about the Super Scope here at the magazine. Some players consider it okay, as Nintendo has taken the light gun concept and refined it into a whole new type of product. Ed, on the other hand, considers it to be a complete waste of money. He suggests that you consider Nintendo's track record at creating, and then supporting their own accessories. Nintendo didn't support R.O.B. (remember the robot); did very little to keep the light gun alive (what was their last gun game?); and quickly stopped making carts for the power pad - all Nintendo products. Was Nintendo there to help the Power Glove, the U-Force or Konami's Lazer Scope - no. How long will it be before they dump the Super Scope? While it is too early to tell for sure, all the consumer can do is to pay your money and take your chances.)

SUPER NES HI-TECH

NINTENDO RELEASES DETAILS ON S-NES CD-ROM...!

At the Winter Consumer Electronics Show, Nintendo quietly sent out a press release on its upcoming Super Nintendo CD-ROM drive. This announcement revealed, at least partially, what kind of unit Nintendo is planning on bringing out.

From the sketchy specifications, the Nintendo CD-ROM appears to be capable of doing many of the same tricks that Sega's Mega CD-ROM unit can do, all for a price that is almost half of what Sega's unit is selling for in Japan.

CO-PROCESSOR

Sega has gone to great extremes to include a state-of-the-art co-processor into their unit. This 16-Bit chip runs at a very fast 12.5 MHz and can also do biaxial scaling, rotation, zoom and fade. Full motion video has already been demonstrated. Nintendo does not give a lot of information about its co-processor other than the fact that it will allow full screen, full motion video. Whether it will run faster (it can't run any slower!) and help cure the problem of slowdown and flicker has not been revealed.

SYSTEM MEMORY

Sega's Mega CD-ROM comes with 6 Megabit of RAM. Nintendo claims that their unit will have 8 Megabit. While

The CD-ROM will connect to the Super Nintendo through the port on the bottom of the Super NES.

larger, this is mainly a numbers game as both can more than handle any type of game information.

ACCESS TIME

Both systems are utilizing the fastest CD-ROM drives. Access speeds are virtually identical, but what Nintendo is not saying is how reliable their drive will be.

An artist's rendition of Nintendo's new Super Famicom / S-NES CD-ROM.

CD-I COMPATIBILITY

CD-I is rapidly becoming the CD standard for interactive video. Nintendo is working with Phillips in creating a special CD-ROM XA "bridge format" and this will allow the Super Nintendo CD games to play on the Phillips CD-I hardware (but not the other way around).

OTHER FEATURES

The Super NES CD-ROM will be the same size as the Super Nintendo game system (9.5" deep, 7.9" wide and 2.9" high). It will connect to the EXT. port on the bottom of the Super NES, and it will take on the stacked appearance as Sega's system/CD-ROM drive. With the units stacked on top of each other, the Nintendo CD-

ROM will not have a lower price "flip-up" cover as found on the NEC CD-ROM. The access door will be motor driven, like Sega's unit. Like the NEC CD-ROM, the Nintendo unit will require a System Cartridge which contains the RAM, ROM and their graphics co-processor. This System cartridge will plug into the cartridge slot on the S-NES.

PRICE

The biggest surprise is the price. Nintendo claims that their CD-ROM unit and System Cartridge will cost only \$200. The Sega CD-ROM is currently selling for \$380 in Japan.

LOCK-OUT CHIPS

Want to play Japanese games? Good luck! Sega has gone on record in stating that the operating system chip in the U.S. CD-ROM will not play non-U.S. games. Sources inside Nintendo say that the S-NES CD-ROM will have a security chip built inside the U.S. units. The CD games will then be encoded with a program which will only playback on CD-ROM drives with the security chip in them. No word yet as to whether the Japanese discs will have the same encoded program.

AVAILABILITY

Sega will have their CD-ROM ready in Sept. '92, Nintendo in January '93.

- DOMES

Location of Secret Rooms and Special Speed-Up Mode - Long a mystery to fans of the arcade Smash TV, the locations and method of reaching both the secret rooms and hidden Pleasure Domes have been revealed in the Acclaim translation for the Super NES!

Using the maps to the left, plot your way through the carnage of Smash TV to reach the arenas directly left of the secret rooms as shown.

When the battles subside in the "Total Carnage", "Buffalo Herd Nearby" and "Secret Rooms Nearby" arenas, an exit will appear below the top door in the room. Instead of leaving through that exit, push against the right doorway and you will magically be transported into one of three secret rooms. From there you can plot a new course on the map or take a shortcut directly to the Boss of the level.

In each secret room, as well as in the Pleasure Domes (which can only be reached if you have 10 keys by the room marked "?" below) and after the evil M.C. is destroyed, a question mark will appear. If all five icons are collected the game will display a special ending and restart at twice the normal speed!

The secret room!

Happy, happy! Joy, Joy!

If 10 keys have been collected, the round will read "YOU HAVE ENOUGH KEYS" and you will be permitted into the Pleasure Domes. Otherwise, only the exit to the final Boss will open.

If you collect all five question marks, the Pleasure Domes will not appear! Instead, the game will "reprogram" itself and activate a special 33 MHz Turbo Mode to speed up the action!

SURVIVAL OF THE FITTEST...

Several years ago, a hot new fighting video game hit the coin-op scene. It was named Street Fighter. It developed so that two players could square off against the computer in quality one-on-one large character combat. Only Karate Champ from eons ago accomplished this feat. Recently, a new generation of World Warriors was born when Street Fighter II hit the arcades. An instant smash hit, Street Fighter II sent ripples of excitement through the gaming industry. Now, after all the hype and doubt, Street Fighter II is appearing on the Super NES as a 16-Meg monster with absolutely no slow-down and non-stop action. This is the game of the decade, unless Street Fighter II Champion appears on Super CD, we hope....

Each scene is loaded with fiery colors and crisp warping effects.

The same combos and strategies you use in the arcade work here!

Practice the art of blocking before you learn the important special techniques.

COUNTERATTACK

The soul may guide martial arts gurus, but they have had years of practice. Many characters in Street Fighter II have several counterattack techniques for you to learn. The ultimate counterattack, the Dragon Punch, is the best choice for aerial assaults. The Jackknife is nearly as effective. Sometimes a simple roundhouse kick or fierce punch will knock enemies out of the air. Keep a

Mix up your attack to keep your foe off-guard for power moves.

BLOCKING

Blocking is the key to survival in Street Fighter II. Even players who know all of the techniques and combos are helpless if they cannot block an oncoming attack. The key is to pull back when you want to block. If an attack is low, pull down and back. If an attack is high, just pull back. Better still, it may be a good idea to avoid being hit altogether. If necessary, jump away by pulling up and

constant eye out for patterns, so that you can throw the appropriate counterattack, like Ryu's Dragon Punch against Blanka's Roll Attack (which removes fully one half of Blanka's energy). Be warned! The only counterattack to a Dragon Punch is to avoid being hit, then hit Ryu or Ken as they descend. Guile's Jackknife is countered by heel kicks, jump-kicks, and Dragon Punches. Dhal-sim can counter attacks by sliding.

VARIETY COUNTS

The worst thing a World Warrior can do is start a pattern. Anyone who is any good at Street Fighter II will quickly recognize it and destroy you, if you try it. Combos are good only if your enemy does not know it is coming. If you continue the same attacks, like following your Sonic Boom as Guile, a good Ken or Ryu player will quickly Hurricane Kick you before you know what hap-

pened. Certain characters can avoid an attack by counterattacking. Others had better sit back and wait for an opening to attack. Sometimes, a simple jump straight up will suffice; for instance, if your opponent throws a fireball your way, jumping up will let it pass harmlessly under you, where blocking would still deplete a little energy. Blocking techniques should be the first lesson of all new prospective World Warriors.

Learn to anticipate your enemy's attack so that you may counter it.

pened. If you find yourself getting wiped out when you used to be an awesome, then you have fallen into the pattern trap. An enemy who waits for you to attack must try to anticipate the proper counterattack. If you can mix up your attacks so that a character like Guile or Dhal-sim cannot successfully counter each and every move, you will find yourself winning against the toughest gamers. Even a novice can be a pro this way.

KEN

Ken is well-known for his berserk-rage. He wields the awesome Dragon Punch at every chance he gets, and he usually catches his opponents off-guard. His strength is also his weakness because his flurry of attacks can be easily countered by a calm, disciplined opponent. Ken will devastate anyone who attacks

GUILE

Guile is a special forces agent who lost his best friend to M.Bison in the Vietnam War. His vicious Jackknife, a whipping somersault kick, will knock enemies out of the air with ease. His counterattacks are formidable, but his pressing attack is bad unless he follows a Sonic Boom. He seeks revenge on M.Bison.

Blanka is the Brazilian mutant who was lost as an infant in a plane crash. He learned to propel his body into enemies at great force and great cost. Ryu is a great martial arts master who uses his techniques with utmost accuracy. His Dragon Punch is supreme, even when matched with Ken. WEAPON STATS

Here is a breakdown on the various weapons that you can pick up in the game. Each weapon has been rated with in three different

categories. First is how powerful the weapon in relation to how much damage it causes the enemy. Second is the speed at which the shots

travel and how fast can can change direction of fire. Finally the repetition of the shots is shown so you can see how fast it repeats.

MISSION ONE: THE STREETS OF NEO CITY

1. Watch out for the dogs when playing on normal or hard.
2. Hop into the tank and plow through the enemies. Use it to destroy the wall.
3. Be sure to get the Barrier so

you can run through the flames.
4. When this tank comes out, stay all the way to the left and shoot. It should be destroyed in no time.
5. While crossing over this pit of lava, be sure to shoot downward.
6. If you have trouble crossing you can destroy the fireballs and cross safely.

BOSS ONE

This oversized turtle is a push-over. If you have crusher or lasers than just get in close and blast away. Use a bomb for faster results.

MISSION TWO

MISSION TWO: MARIA CALDERON HIGHWAY

1. Start your mission here. When you destroy the enemy turret you will get a Flame thrower. It is the only weapon that can shoot through the barrier.
2. Watch out for the cracks in the bridge, because the ground will fall out from underneath you.
3. All around this level there are land mines. They will not explode immediately so keep moving if you step on one.
4. This turret will give you a Barrier or an extra Bomb at random. This should be the next turret you destroy.

You can duck and avoid enemy fire by pressing the jump button.

SURVIVE BY LEARNING SPECIAL TECHNIQUES!

If you hold the Left and Right buttons on top of the controller you will be able to use both of your available weapons at the same time. This is a good technique for fighting bosses in the over-head missions.

BOSS TWO

This boss attacks by spinning at you. Keep moving to the right and blast the boss with lasers when it stops spinning. If you damage the boss it will fly up into the air and dive towards you at great speeds. Shoot it in the eye to kill it off.

MISSION THREE

SHOOT IN 8 DIRECTIONS!

You can shoot in 8 directions while standing still. All you have to do is hold the Right button while aiming.

INCREASED POWER WITH WEAPON COMBINATIONS!

If you have a rapid fire controller, put the X button on turbo. This will allow you to fire both of your weapons at the same time. Try Crusher with Spread or Laser Cannon.

MISSION THREE: ABANDONED CYBER STEEL MILL

1. You will face a swarm of vicious winged aliens. Do not let them take hold of you. Keep shooting and they'll let you go.

2. The best way to destroy this pest is with a Flame thrower. When it dies it will try to toss you into the abyss below so get all the way to the right. Stay to right while the missiles are pass by and you'll be safe.

3. This metallic menace will shoot missiles and scale the wall. Try to stay as close to its top foot as

you can and shoot the missiles when possible.

4. The best advice for avoiding his lightning fast rushes is to keep moving. Watch the eye, when it opens expect it to attack. When it attacks, try to get above or below it and aim at a 45° angle and blast away. It should be gone in no time.

5. When the hovercraft gets on the screen, go all the way to the left and hold Right button and shoot at an angle. Watch for the winged soldiers that come from above.

6. As you walk by here keep shooting to destroy the oncoming missiles.

BOSS THREE

When you first walk into the boss room, twin guardians will greet you. Use Crusher or Flames to destroy them quickly. Blast the red twin first and his torso will start jumping around. Climb to the top of the room and shoot down and the twins until both are dead. A huge skeleton will rip through the wall. He'll send heat seeking fireballs after you and then chase you with a huge flame from his mouth. Shoot and climb in a clockwise pattern to defeat him. He also sets timed bombs out, so move fast or die.

MISSION FOUR: THE BATTLE OF THE BLAZING SKY

BOSS FOUR

It is best to take out the lower cannon and then go for the top. Once both are gone, concentrate on the big red eye. Watch out for the heat-seeking missiles it fires.

1. Stay left and shoot diagonally. When they throw bombs, just jump over them.
2. You can safely destroy the tank and the jetpack aliens by staying to the left and blasting away.
3. These cannons can be destroyed with constant firepower, but can be easily avoided without a fight.
4. Use the Flame thrower and shoot upwards to toast the turrets that appear in this section.
5. This part of the ship is hard to destroy, so just dodge it to live.
6. Hold the Right button and stay in the middle of the screen while you burn these soldiers to a crisp.
7. Try to stay halfway between the cannon and the right edge of the screen. When the cannon fires, jump over to the right to avoid the flames.
8. Go to the left side of the screen and shoot diagonally while holding the Right button.
9. Concentrated shots will keep this pest from hanging around.

MISSION FIVE

BOSS FIVE

This Boss looks a lot more difficult than it really is. Giant sand worms will come out and try to

MISSION FIVE: THE MUCHO GRANDE BADLANDS

1. Everywhere in the level, there are moving patches of sand. Some will rotate and others will drag you towards the edges of the mesa. When destroying the turrets that are surrounded by the sand, you must use the Left and Right buttons and rotate to counter the effects of the sand.
2. Watch out for the bridges. They are timed to explode as you walk across them. Do not hesitate at all when crossing over them.

drag you in. Destroy the sand worms to get power-ups and then get in close and blast the Boss in the eye. Laser or Crusher will work best

MISSION SIX

MISSION SIX: RED FALCON'S MAIN HEADQUARTERS

1. Here you are greeted by an old familiar face. Use the Spread or another high power weapon and get in close to blow him away.
2. At this point, you'll need Spread and you must get in close to the heart and fire at an angle.

3. This creature is only vulnerable when its face is showing. Watch out for its quick attacks and poisonous shots.
4. Be sure to get the Crusher.
5. At first, it will lunge at you. Shoot straight up or down and you will inflict the most damage. Its next attack is more dangerous. When it appears climb down a little and blast on an angle.

GET READY TO FIGHT THE RED FALCON MOTHERBRAIN!

You have made it to the lair of the Motherbrain. First, you will have to fight the vicious Red Falcon in the form of a three headed monster. Concentrate on the outer

heads first and then go for the main face. Crusher and Laser work very well on this Boss. Alien drones will come from the outer faces after they are destroyed.

When all three faces are killed, the Motherbrain will appear. It has eight different forms and attacks very aggressively. Look at the strategies below to defeat it.

This is the easiest form. Just shoot and dodge it as it flies about.

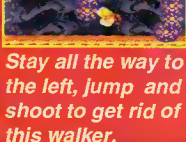

You cannot shoot the orbs. Avoid the deadly orbs at all costs.

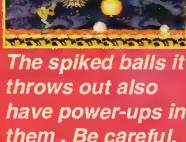

It only shoots eyes at you. Stay in the left corner and shoot away.

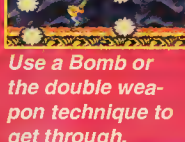

It makes 4 passes, and is very difficult. Look at the pic for safe spots.

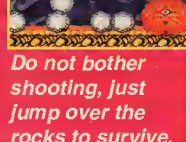

Stay all the way to the left, jump and shoot to get rid of this walker.

The spiked balls it throws out also have power-ups in them. Be careful.

Use a Bomb or the double weapon technique to get through.

Do not bother shooting, just jump over the rocks to survive.

Fight to the End

New from Jaleco is a fighting game called Rival Turf. This 8-Meg cart is packed full of awesome features not usually found in fighting games.

After the title screen, select from two different guys. Jack Flak is very fast, but not too powerful, while Oozie Nelson is extremely powerful, but lacks speed. There is also a two player simultaneous mode where the players can pick their men and/or even be the same. In the option screen, you can select different control configurations, sound test and also a two player hit option. After the game has started you will notice a map of your position with some nice Mode 7 scaling. Level one puts you in the heart of the city fighting through a bus station and even inside of a bus! Levels two and three take you to a helicopter which transport you over the border to search for the hideout in which you encounter the leader of the gang in level six, the final level.

Game play is unique in that the two player mode is simultaneous. Players can be the same character at the same time! Two player hit mode can also be turned on at the option screen for more fun.

Be prepared for action at all times! Even when walking in a track stadium, look out for bad guys. Use the pipe as a weapon!

FANTASTIC CINEMA DISPLAYS!

A well animated introduction shows the events that lead Lester into his adventure. The whole game is filled with these intermissions. The quality of the animation, the realism of the sound effects and the impressive music all combine to make this game a treat for the eyes and the ears!

OUT OF THIS WORLD

A JOURNEY TO REMEMBER!

Who says that scientists never take risks? Enter the studies of Dr. Lester Knight Chaykin who has set up a secret base where he conducts his particle acceleration theories. Unfortunately, he decides to run his experiment during a stormy night. As he goes through the test, a bolt of lightning strikes the lab and sends an extremely charged particle down the main thruster tube. As it collides with the destination of the particle, Lester is suddenly charged with over 300 gigawatts of pure energy. Suddenly, he vanishes into another dimension leaving behind a crater

where his desk had once resided.

Before his stunned eyes, Lester appears in a great pool and as he emerges, he begins to examine this whole new world!

Out Of This World is translated from the soon-to-be released version on the PC. All of the quality and originality of the computer version is retained perfectly. The animations of the characters and the quality of the sounds present a sense of awesome realism to the game. From Lester's chugging down a soda to his running from the evil creatures of this unknown world, the challenge and excitement of this game will continually surprise you. This is definitely a title worth adding to your Super NES library!

THE GUN IS YOUR MAIN WEAPON!

At its lowest power, the gun will produce a simple beam of energy. You will mainly use this power setting on the enemy soldiers that are attacking you!

If you hold down the fire button, the gun barrel tip will start to glow. Once you release the trigger, a shield will set itself up and protect you from laser blasts!

If you hold the button even longer after the second setting, a ball of energy is produced that can destroy obstacles or that can penetrate shields.

Before you enter the caves, you will find a booth that will replenish the battery life of your pistol. Simply step through and get a buzz!

As you start your adventure, the desk that you were sitting in appears in the middle of a pool of water. Do not take the time to figure out what has happened to you, because a slew of tentacles will reach out from the bottom of the pool to drag you down! Swim to the top *fast* and get your butt out of there! Run towards the right and you will come across several worms dropping from the ceiling. To get rid of these killing pests, you should kick them.

However, as you advance a few screens, a four legged killer beast stands in your way next. Make sure that you run the other way, and make a grab for a hanging vine. If you do things right, the beast will be slain, but you will be captured!

After you power-up your gun, go to the right and find the bridge that is split apart. Take a running leap off of the edge and you will land on a protruding ridge. Blast a good sized hole in the wall next to it and you will enter an intricate cave system!

Now you did it! You are captured by a rifleman from an alternate universe! As you hang with an alien cellmate in a cage, the guards are slowly patrolling the ground. Swing the rickety cage to snap the suspended cell onto the guard below. If you watch closely, the guard drops a pistol. Be sure to grab that when making your escape. (Refer to the first page for details on this pistol.)

Next, you and your new friend from the cell must hurry down the hall and blast through the three large doors that block your paths. You should move as quickly as possible because the guards will follow you and try to incinerate you! Eliminate them before they have the chance to kill you!

The caves have plenty of different areas to explore, so watch your step because most of the holes in the ground contain spikes. Do not forget to release the water from the waterfall and high tail it out of those caverns!

The caves are filled with pitfalls that could be hazardous to your health! Concentrate on the first and second levels!

## THE ADVENTURE CONTINUES....

There was much hype and controversy surrounding Enix's newest hit, Soul Blazer! Many thought it was just another remake of their smash hit, ActRaiser, but they were wrong!

Soul Blazer is a completely different quest game for the Super Nintendo! The game is set in an overhead perspective. Many areas are available to explore including many hidden passageways!

The shimmering blue Orb is your only companion in your quest to rid the world of the most evil entity of the universe! Your Orb can fire eight different types of magic ranging from the weak fireball, all the way to the powerful Phoenix weapon! Determining what magic you can cast will depend on how many gems you possess! The Orb also has the ability to cast light when you are in a dark room, and can even locate hidden passages!

You can collect new weapons and armor by locating treasure chests along your route, but sometimes, the treasure chests will come alive and attack you!

Soul Blazer is a fantastic blend of action and role playing all rolled up into one fun-filled cart!

*Here is the first room. Within the treasure chest lies your sword! Talk to the old man to receive your Orb!*

*In the subscreen, you will be able to pick from the available weapons and find your armor as well as Orb magic!*

*If you touch the blue crystal, a fairy appears to warp you back to the overworld!*

*The fire pits are always here, so you can gain experience at any time!*

*Meet the first Boss! His pattern is predictable, so you should defeat him easily!*

Stage 2 is set in a swamp-like landscape. Watch for alligators!

Stage 3 places you in an underwater paradise with mermaids!

Stage 4 is set in an underground cavern with treasures everywhere.

Stage 5 puts you in the center of a haunted house!

Stage 6 has a beautiful castle as the backdrop! Solve the mystery!

In Stage 7, you are placed at the entrance to your final enemy!

## OVERWORLD MAP

For Stage 1

This is the Inn. You can receive H.P.'s by talking with the woman.

This building is a store where you can purchase herbs for your quest!

Here, you must turn the wheel to get the waterwheel spinning!

In this house, you must talk to the woman to receive information!

When you first see this stage, it will be nothing except grassland, but the more enemies you destroy, the more the town will become developed!

Contra 3 is a sequel to end all sequels! This version fully utilizes all the special effects in the Super NES! The Red Falcon's forces are wrecking havoc on your fair city! Pick up new weapons and blast away the alien invaders! Take on the bosses in ways never seen before! If the action gets too intense, have a friend join in to help you rid the city of these infestation aliens!

✓ A truly spectacular game! To date, there hasn't been a better game which shows off the special effects that can be done on the Super NES. The game is challenging, but not impossible. The graphics are very detailed and the music is well above average. Leave it to Konami to set the standard which everybody else must try to meet.

Contra 3 is a visual and audio masterpiece. The graphics are among the best I've ever seen on a home system. The Bosses are animated through Mode 7 for incredible special effects. Rockin' tunes in awesome digital stereo and explosive sound effects are present. Best of all is the near perfect game play and three levels of difficulty!

WOW! Now this is what a sequel should be! All of the different animations of the characters, the explosions, the bosses, and especially the rotaiting overhead scenes make this one of my faves! Though a bit on the easy side, the detail in this game makes it a winner! Any relation to the last level and "Aliens"?

Princess Zelda needs your help once again! Agahnim, the evil wizard, has cast a spell of darkness on Princess Zelda and the town of Hyrule! Travel through strange and mystical towns in search of clues to find him. Link must use his wits and muscle to overcome the forces of evil! He can learn powerful spells and collect enchanted items to overthrow the Wizard and save Zelda from certain doom!

It has been an unbearably long time since Zelda 2, but the wait was worth it. The quest is very long, yet it isn't too difficult for the younger player. The graphics have been substantially improved over the last game but not as good as one would expect from the S-NES. Still, it is worth buying but it's too easy for the experienced player.

This cart will not disappoint fans of the original. The graphics are very detailed, yet have a very simple and cartoon quality. The music is phenomenal and the sample strings and percussion will blow you away. The quest is without a doubt one of the most interesting and challenging on the Super NES. It is the best SNES RPG yet!

As one of the only RPG fanatics here, I thought this game has all the power to be one of the best RPGs on the 16-bit market! There is a huge quest, lots of enemies to kill, and (what I like most) there are little plots that form into a giant one! Not to mention TONS of little tid-bits and secret tricks around Hyrule! AWESOME!

Konami is on a roll! Their Super NES line-up is going to be hard to top. Castlevania 4 does what all sequels should do - improve on everything! Graphics, special effects, music and challenge are all right up at the top of the chart. Another good reason why you should go out and buy a Super Nintendo. And the best is yet to come!

Easily the best Adventure Island to date! With graphics that are very detailed and character animation that is smooth and well done, this cart is Hudson's best. It is fun for players of all ages and has a difficulty curve that doesn't get frustratingly hard. There are lots of hidden items and bonus rooms to keep you looking for hours.

G  
U

Wow, talk about fast games! Acclaim has taken a very intense arcade game and worked miracles with the slow S-NES to somehow kick the system into overdrive. Talk about flicker and slow-down... not here! Not for the average player as this puppy is hard! Finish the game and it goes even faster!

Simon's back! This is a great cart to own to show off the graphic and sound capabilities of the SNES. The game play is very good and there are a ton of levels. The only thing I miss is the ability to change into other characters like in Castlevania 3. All around this is a very impressive cart and definitely a blast to play through.

Hudson hits hard with another Adventure Island cart. The graphics are colorful and the animation is superb. Watch for little details in the backgrounds like crashing waves and other effects. Great music with heavy base lines and sampled effects. The game play is very good but the difficulty is set too easy and the cart is over too soon.

D  
U

Smash TV is one of those games that proves the SNES can handle arcade quality action. There are tons of sprites on the screen and no slow down!!! The game play is very well done and the graphics are great. The graphics have been toned down and lose some of the intensity of the coin-op. Solid cart Dude.

The original Castlevania was the cart that got me hooked on the NES. As my faith was slowly dropping in the Super NES, this game reinstalled my faith! Music is top notch - giving a sense of horror. The same power-ups as the original, and the flailing whip is welcome! I'm glad to see that they kept the traditional Reaper was kept in!

M  
I  
K  
E

I'll admit it, when I first heard of the cart being made - I was a bit sceptical. But when I played it, I was hooked instantly! The game play is just a simple concept, but the MUSIC! The music makes the game! My only complaint is the shortness of the game. I got to the last boss too quickly for my likings. Great effort Hudson!

M  
I  
K

All my friends know I like a stress-releasing game. Smash TV fits that category 'cause you can release your stress on others! As a complete fan of the arcade, I find the Super NES version to almost handel and even play better than the arcade! A bit on the hard side, but the hidden rooms and the pleasure dome ad lots more!

If all else fails and you just cannot win a level, click on the nuke button and watch them all blow up! There are 125 challenging levels so this one will not be beaten in a day! Lemmings is available in stores now!

While the lemmings may be brainless, don't expect the game to be a no brainer. Once you get into it, you will find that this cart becomes very addicting as you have to do the thinking for all of the little tikes. One wrong move and you will have 40+ dead residents on your hands...and conscience. Amazingly devious!

G  
U  
Y

Lemmings is one of those carts that you like or don't like the first time you play it. The graphics are nothing to shout about and there is slowdown even with such small sprites. The music is good but gets repetitive easily. The best thing about it is the game play. A fun and addictive game that most will enjoy. Nuk'em all!

As a fan of the original Amiga version, I think many different improvements could have been made in this title. Not to be picky, but a better intro could have been used, and some of the sounds were a bit grating. Though the game play is intact and the controls are better. But blowing up a 100 lemmings is not as fun with slow-down!

Spanky was walking through the forest one day when all of a sudden, large bricks fell around it! It got confused and woke up in a fantasy world! An evil witch is taking over this world and Spanky is just the monkey to stop her! It must collect keys to travel to different rooms! Also, it has bubble power to stop any enemies that he may come across! Spanky's Quest is a great game for kids (of all ages)!

Not every game is made for the die hard player. Sometimes the little kids (and parents) have to have fun. This is that type of game. No lightning quick reflexes needed here as the game is paced slower than normal. The bubble attack is an interesting concept and something which is easy to learn but still requires some technique.

Spanky is a cute game geared for younger audiences. The graphics are not spectacular but have a cartoon quality to them that will appeal to kids. The game play is very good and have plenty of technique. While it seems to be a kids game there is enough here to attract veterans who grew up on Bubble Bobble and Mario.

Hmmm, it is different! I'll give it that. Being somewhat similar to bubble bobble - this game has a lot of different qualities. The game is challenging, there are loads of levels. However, the game wears a bit thin after awhile. The bonus stages are a bit easy and the music gets a bit annoying at times. Cute animations is just about it.

Based on the popular Genesis title of Thunder Force III, Thunder Spirits is a great shooter! Choose from five potent weapons and the rotating claw! The weapons are changeable, so you can use the best one for a job! Thunder Spirits contains new levels not found in the Genesis title including one level from Thunder Force III! The bosses are huge and animate fluidly! Watch for this title!

I don't know if I should be mad at the system or the programmers who tried to make this game. Forgetting about what was done on the other system, this game has a tremendous amount of slowdown and a lot of screen flicker. At times, you get killed because the enemy's bullet is lost in the flicker. Could have been better.

Thunder Spirits is a disappointment. If I had never seen TF3 on the Genesis then this cart would be a decent shooter. It is plagued with slowdown and choppy game play. The bosses aren't nearly as tough and the weapons don't animate very well. The music is OK but the sound effects are poor. Sort of like sampled 2600 blips.

I'm sorry - but I expected more from this cart. The only thing this cart has good for it is that the sound effects reminds you of the good old days of the Atari 2600. There's bad animation, horrible play control, bad sound effects, just plain O.K. graphics, and is too dull for me! But if you can look past all that I guess it's pretty good.

Based on the movie of the same name, The Rocketeer puts you in the shoes of Cliff Seacord! In the beginning of the game, you must successfully race the Gee Bee in two races to qualify for use of the rocketpack! Once victorious, Cliff must fight off an evil group of war-torn terrorists determined to steal the rocketpack for their own evil-doings! The Rocketeer will be available by May.

Nothing extraordinary here. While the digitized graphics are a nice touch, the game play is what makes or breaks the game. The control was less than perfect and this got me killed a couple of times in the game. The first level is strange, as flying around poles just doesn't get me too excited. Needs more action.

G  
U  
Y

Rocketeer is a game that will have to rely on its title. The game is split into several different sections. There really isn't much to the game play. The scene that I like best is the hangar shootout that resembles Cadash. Other than that, I found this cart boring and too short. Cool cinema stills in between rounds do help.

D

I loved the movie The Rocketeer, and as a sequel to this movie makes this cart more worth the buy. However, there are only four levels to this game - which makes it very short. Also, I found the first two levels to be quite useless to the game, just flying around poles. AWESOME graphics, but a tremendous lack of game play!

You may choose from Triton, Alcedes and Panthera at any time! Each cyborg has unique abilities, as well! You can collect new weapons throughout the journey to build up your cyborg to tremendous proportions!

This game, I believe, is going to be a sleeper. First impressions (very important) are not good, but only when you really get into the game do you realize how deep and involved this adventure cart really is. You're going to have to force yourself to keep going but if you do, you will find the effort well worth while. Slow to start but solid!

Xardion has a lot of really cool ideas, but the game play is executed poorly and ruins the fun. The graphics and animation are very choppy and the sounds are not up to par with most 16-Bit titles. The ability to change into different robots is cool, but everything else in the game is done at a substandard level and disappoints me.

Well, a lot of people have been saying that this game is not that spectacular, I happen to agree! There is not enough originality to make this game worth while. From the success of the NES Zapper comes a new series of games involving the Super Scope 6! The menu is divided into two groups called Blastris and Lazer Blazer! In each category, there are three games like Mole Patrol, Intercept and Confront! You can even play a game of Blastris where you play a Tetris-type game - except it only moves sideways! Super Scope 6 is available in stores now!

This is a gimmick! At least I could do different things with the light gun, but not this bazooka. The games are boring, repetitive and didn't hold my interest. Nintendo didn't support its light gun for long and what should players do with their Power Pad? I just don't trust Nintendo. Wait till more games come out.

Super Scope 6 is a very cool idea for a peripheral. The gun is well built and easy to aim. The games it comes with are very boring, however. There are 3 warfare oriented games that will appeal to most. The problem is that they are extremely repetitive and offer little or no action. Maybe a 16-Bit Duck Hunt would be cool.

To be quite honest, I feel that it is too early to tell how the quality of this product is going to be. It definitely has the potential, but then again so did the Zapper for the regular NES and look what happened to that. What I have seen has been good, like Terminator 2 and conversion came out it would be better. Just average so far.

## Peace in the Galaxy? NOT!!!

Gradius has experienced a problem. It has become invaded by the Bacterion Empire, a nasty virus that has wreaked havoc throughout the galaxy. In order to stop this, a starship has been built for you called the Vic Viper. Now it is time to rid Gradius and the universe of this terror.

If you successfully navigate your ship through the ten intense levels, then you will meet the final obstacle - the Bacterion Emperor himself. Can you defeat evil and restore peace to the galaxy? I hope so.

*This level is filled with all kinds of hideous organisms.*

*Blast through the Bacterion tissue. Beware, it grows back!*

*What is this place? Keep your eyes peeled.*

*So he's the brains of the operation?!*

*Get out of the Bacterion base, or be atomized!*
